

**TOTO®**  
**NEOREST®**

*"Water is the purest of the elements.*

When you express this purity as design, it becomes perfect simplicity.

NEOREST® is the very essence of this expression."

NEOREST.

Neorest literally means 'new rest'.

To the designers at TOTO®, it's about creating a new way to live in the modern bathroom; a refining of humanity's relationship with water. Here, technology and design bond to form a sense of relaxation like no other. The result is a suite that is as luxurious and intuitive as any can be.

The Neorest suite is living, breathing proof of this. And we do mean 'living' and 'breathing'. It remembers the water temperature you prefer and how deep you like your bath. It even 'senses' your approach and prepares accordingly.

In this respect, connecting human need with human desire has become a design philosophy. The restorative benefits of water are enhanced by pure innovation. We like to think of it as 'ergonomic technology'. It makes every single experience more rewarding. And that, we see as the peak of luxury.

The Neorest Air Bath™ is the centerpiece of this suite and the embodiment of relaxation and replenishment. It is designed to bring back the exquisite art of bathing, in a highly innovative way. An LCD control panel will carry out your every command. It remembers every detail about what you like, controlling water temperature and depth, so it can fill automatically. It also controls a unique spa-like hydrotherapy system and a special therapeutic treatment called chromotherapy, which uses colored light to soothe and stimulate the senses.

The design of the Air Bath itself reflects a simple elegance. Clean, straight lines offer a visual sense of space and remain harmonious with the water line. The spout accentuates water's natural beauty by allowing it to flow like a waterfall.

Too much beauty and luxury not to be shared. Which is why it was designed for two, with padded neck rests and cascading water at each end to gently soothe your shoulders. The hydrotherapy system is just as unique. Fifteen small air jets deliver millions of tiny warm air bubbles to caress and massage you. (Air jets are gentler than water jets.)

When you're looking for peace and relaxation, this Air Bath will exceed your every expectation as the perfect sanctuary.

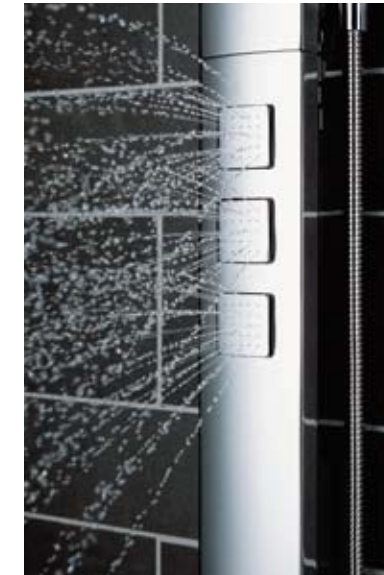

If we were to choose just one piece from the Neorest suite that exemplifies the art of simplicity and function, it would be the Neorest shower tower. One simple, graceful line rises from wall to overhead – and offers three perfect ways to envelop your body in tranquil warmth.

From the showerhead, you can experience a gentle rainfall. On the tower, three separate horizontal body sprays will soothe and pamper you. A hand-held shower is also provided, to ensure that no part of you is left out. All are controlled simply, by three push buttons arranged vertically on the tower – accentuating the elegance of the design.

The Neorest shower tower can remember your preferred temperature setting, making your interaction with water as effortless as possible. And whenever you need the water to be warmer or cooler, an innovative temperature control at the base of the tower will make that change happen instantly. (None of that old-fashioned ‘waiting’ for the water to get hotter or colder.)

This Neorest shower tower is all about adapting to you and your every desire.

The lines of the Neorest lavatory were created to imitate the flow of water as it cascades from the faucet. Again, it's about harmony and simplicity - and touch. The water feels like silk falling through your fingers.

What is beautiful in aesthetics is also beautiful in use.

Approach the lavatory and two 'smart sensors' in the faucet will respond; blue LED lights illuminate, ready for you to engage with it. A mere wave of your finger gives you cold or hot water instantly. And so you'll know for sure, the LED lights change from blue to red to indicate cold and hot. Of course, the faucet will turn itself off when it no longer detects movement, just to save water.

This lavatory also uses TOTO's brilliant SanaGloss® glaze, which gives you a superior clean. And a beauty that lasts.

Permit us to boast for just a moment.

TOTO is the undisputed world leader in toilet innovation and design. And the Neorest 600 is testament to just that. It is the first intelligent, 'aware of you' toilet that takes personal hygiene and comfort to a whole new level. In truth, calling it a 'toilet' at all is far too limiting.

The lid rises automatically for you when you approach. But that's just the beginning.

From a sleek, wireless remote control mounted on the wall, you can control the Neorest 600's every feature. Its triumph is an aerated stream of warm water that cleanses more gently and hygienically than paper ever could. The remote lets you control water temperature, pressure and direction. It also lets you choose warm air drying, and can even set your preferred seat temperature. There are many other innovative comfort features as well.

Here again, simplicity of form follows function. You'll notice there is no tank. This helps create a more modern, stylishly contoured look. And just as remarkable, on the inside is the Cyclone® Flushing System - a revolutionary way to use and conserve water.

Neorest is about elevating every experience to the highest level. So, if you must call it a toilet, consider it the most luxurious one in the world.

We trust you've enjoyed this introduction to the Neorest experience. In the following pages, you can see the myriad cutting-edge features and benefits of each product 'at a glance'. Collectively, they make it clear that this extraordinary suite is unlike any other.

For more detailed information, we invite you to visit an authorized TOTO Neorest showroom. To find a showroom near you, go to [totoneorest.com](http://totoneorest.com), or call 1-800 350 8686 x600.

**Air Bath**

Length - 70-7/8" (1800 mm)

Width - 55-1/2" (1400 mm)

Depth - 28-1/2" (725 mm)

SanaGloss glaze on bowl for a more hygienic, easy-to-clean surface.

No detail is insignificant when it comes to creating the most luxurious experiences - in style or substance. That's why every accessory, down to the smallest robe hook, is designed to echo the Neorest philosophy.

The towel bar for instance, is one elegant single line of solid brass finished in polished chrome. And it's designed specifically to hold those extra-thick fluffy towels. You'll find every piece has been created with as much care and attention.

With Neorest, there is pure elegance in simplicity. Wherever you look.

**Robe Hook**
